ACRYLITE® Multicolor acrylic sheet

A Wealth of Colors

No End of Colors
ACRYLITE® Multicolor acrylic sheet is a multi-layered solid sheet. Let yourself be inspired by the billions of possible color and surface combinations. Whatever the look you hope to achieve, ACRYLITE Multicolor sheet offers you numerous color combinations, as well as a multitude of fascinating edge and lighting effects.

Simply Innovative
Choose the desired hues from some 250 possible ACRYLITE sheet colors and give free rein to your creativity. You can combine transparent, translucent and opaque colored layers.

Our special manufacturing process provides sheets with two or three different colored layers that give you a completely free hand:
• high-gloss, satin or textured surfaces
• a transparent middle layer
• a colored middle layer
• upon request, we also manufacture sheets in your individual corporate identity color.

Quick and Cost-Effective
Two- or three-colored motifs can be simply obtained by cut-outs of different depths.

From now on, you can forget all problems of surface bonding and the associated costs and risks.
ACRYLITE® Multicolor acrylic sheet

For Inside and Out
ACRYLITE Multicolor sheet is ideally suited for outdoor use. Unlike sheets with conventional adhesive film, ACRYLITE Multicolor sheet shows the legendary weather resistance of ACRYLITE sheet. What’s more, the color layers are inseparably fused with each other, making delamination impossible.

The Eye-Catcher
ACRYLITE Multicolor sheet is ideal for creating lighting effects and adding splashes of color. Whether lighted, transilluminated or edge-lit, ACRYLITE Multicolor sheet attracts favorable attention.

Furniture, P-O-P displays and presentation elements as well as luminaires and luminous objects made from ACRYLITE Multicolor sheet always catch the eye.

Product offering and minimum requirements:
Sizes: available in 47” x 79” (1,200 x 2,000 mm) and 75” x 114” (1,900 x 2,900 mm).
Masking: adhesive poly on both sides.

The total thickness of the final product must be at least .354” (9 mm). The middle layer must be at least .118” (3 mm) and can be up to .984” (25 mm) thick. The two outer layers must be the same thickness and must be at least .118” (3 mm) thick and can be up to .236” (6 mm). The two outer layers can be different colors.

Orders must be placed through an authorized CYRO distributor for a minimum pallet of fifteen (15) sheets and must be of the same sheet size and total thickness. A minimum of five (5) sheets per pallet can have different outer layer color combinations. The middle layer on any one pallet must be the same color and thickness.
